DEPARTMENT OF FORENSIC MEDICINE & TOXICOLOGY

E-MAGAZINE OCT-DEC 2022 VOL.1 ISSUE 3

**MAY I HELP YOU!!!**

**CYBER-CRIME & ITS FORENSIC IMPLICATIONS**

**52,974**

**Incidents of cyber-crime cases reported  
in India within 1 year**

**According to the NCRB data.**

**National Cyber Crime  
Reporting Portal (Helpline  
Number - 1930)**

**CYBERCRIME  
MAGAZINE**

## What is cyber-crime

- Cyber-crime is an “unlawful act in which the computer system is used either a tool or a target or both “.
- Cyber-crime occurs when information technology is used to commit or conceal and offence.
- Cyber-crime is intentional and not accidental.

## Types of cyber-crime

Cybercrime ranges variety of activities. Cyber-crime can be basically divided into three major categories:

- **Cyber-crimes against persons** like harassment occur in cyberspace or through the use of cyberspace. Harassment can be sexual, racial, religious, or other.
- **Cyber-crimes against property** like computer wreckage (destruction of others' property), transmission of harmful programs, unauthorized trespassing, unauthorized possession of computer information.
- **Cyber- crimes against government** like Cyber terrorism.

# Cyber-crime statistics

**GSSCORE**  
**Datastory**

State wise reporting of cases:

Uttar Pradesh **11097**

Karnataka **10741**

Maharashtra **5496**

Telangana **5024**

Assam **3530**

**CYBER CRIMES IN INDIA**

Total number of cyber crime cases recorded

**2020**  
**50035**

**2019**  
**44735**

**2018**  
**27248**

**11.8%** surge seen in 2020 as compared to previous year

Rate of cyber crime (incidents per lakh population)

2020 **3.7%**

2019 **3.3%**

Types of Crime reported

Online banking fraud: **4047**

Fake news on social media: **4047**

OTP frauds: **1093**

Cyber stalking: **972**

Credit/Debit card fraud: **1194**

Fake profile: **149**

Cases related to ATM: **2160**

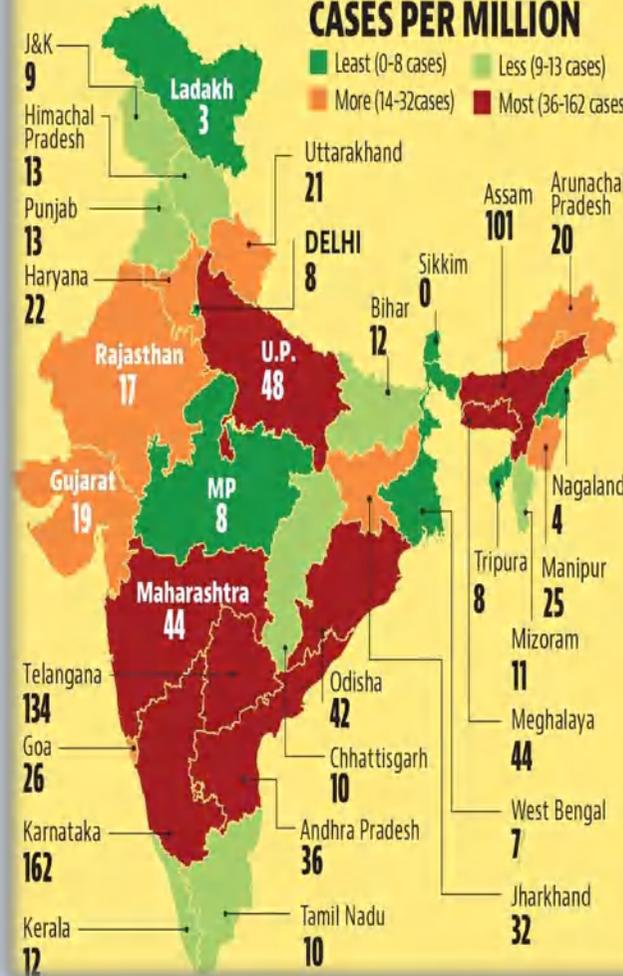

Data theft: **98**

## Vulnerable digital space

Number of cases filed last year under sections dealing with cyber crime rose to 50,035 from 44,735 a year before as more people moved to working from home, spending more time with digital tools

CASES PER MILLION

Least (0-8 cases) Less (9-13 cases)  
More (14-32 cases) Most (36-162 cases)

RATE OF CRIME

| State          | Cases filled in 2020 | Change from 2019 |
|----------------|----------------------|------------------|
| Uttar Pradesh  | 11,097               | -2.8%            |
| Karnataka      | 10,741               | -10.6            |
| Maharashtra    | 5,496                | 10.7             |
| Telangana      | 5,024                | 86.7             |
| Assam          | 3,530                | 58.2             |
| Odisha         | 1,931                | 30.0             |
| Andhra Pradesh | 1,899                | 0.7              |
| Bihar          | 1,512                | 44.0             |
| Rajasthan      | 1,354                | -23.2            |
| Gujarat        | 1,283                | 63.6             |
| Jharkhand      | 1,204                | 10.0             |
| Tamil Nadu     | 782                  | 103.1            |
| West Bengal    | 712                  | 35.9             |
| Madhya Pradesh | 699                  | 16.1             |
| Haryana        | 656                  | 16.3             |
| Kerala         | 426                  | 38.8             |
| Punjab         | 378                  | 55.6             |
| Chhattisgarh   | 297                  | 69.7             |
| Uttarakhand    | 243                  | 143.0            |
| Delhi          | 168                  | 46.1             |

## News-Paper Articles

### THE PEGASUS PROJECT

► Paris-based media nonprofit Forbidden Stories and Amnesty International accessed a leaked database of thousands of phone numbers across the world targeted by a spyware called Pegasus

► They shared the data with global media organisations as part of a collaborative investigation called Pegasus Project

► An Israeli

company called NSO Group makes Pegasus, a spyware capable of extracting data from a phone

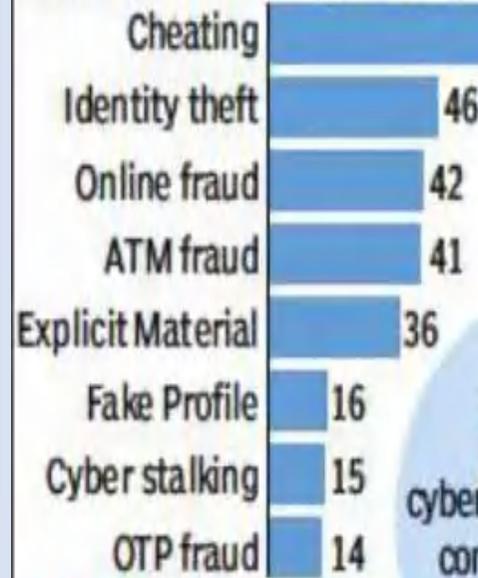

► According to the report, at least 2 Union Cabinet ministers, 3 opposition leaders, a Constitutional authority, government officials, scientists and over 40 journalists in India were targeted

## BE SAFE ONLINE

### Major cyber crimes registered in Gujarat

26.5% increase in cyber crimes reported compared to 2016

### 5 Types of Cyber Criminals

The Social Engineer

The Spear Phisher

The Hacker

The Rogue Employee

The Ransom Artist

### THE CHEATED

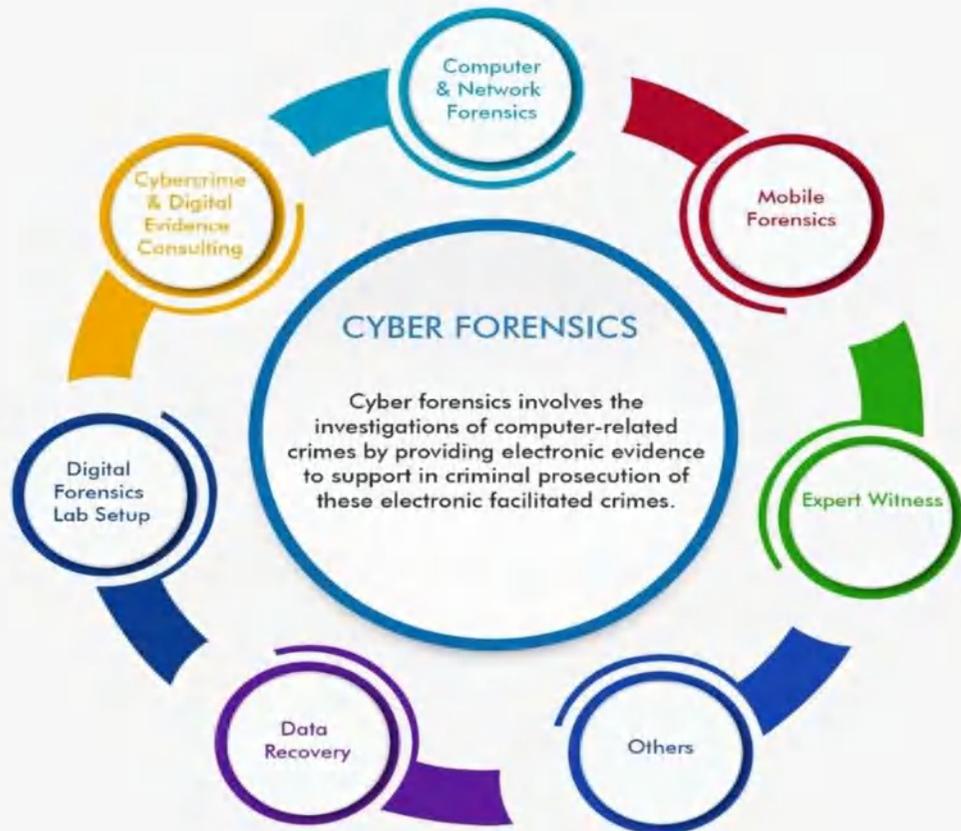

► In October, Ahmedabad resident paid Rs 61,000 for getting a refund for a bad pizza as online cheats sent him a link and duped him off the money

► In September, a 20-year-old jilted lover from Gandhinagar was arrested for making fake profile of a girl and posting obscene pictures and messages

► In June, cyber cell arrested 7 accused for creating phishing websites that mimicked the income tax website and web pages of leading banks. When victims downloaded the mobile application, it gave fraudsters access to all personal details. They could extract information from victims' phones were 'active' or in 'sleep mode'

# Cyber Forensic Steps

## Steps of Digital Forensics

### 1. Identification

First, find the evidence, noting where it is stored.

### 2. Preservation

Next, isolate, secure, and preserve the data. This includes preventing people from possibly tampering with the evidence.

### 3. Analysis

Next, reconstruct fragments of data and draw conclusions based on the evidence found.

### 4. Documentation

Following that, create a record of all the data to recreate the crime scene.

5. Presentation    Lastly, summarize and draw a conclusion.

## DOS & DONTs

- In case you are a victim of cyber fraud, take screenshots of online transactions
- Inform police immediately about the cyber fraud so that quick action can be taken
- Do not click on any unknown link. It may forward you to a third-party application and you may fall prey to cybercrime

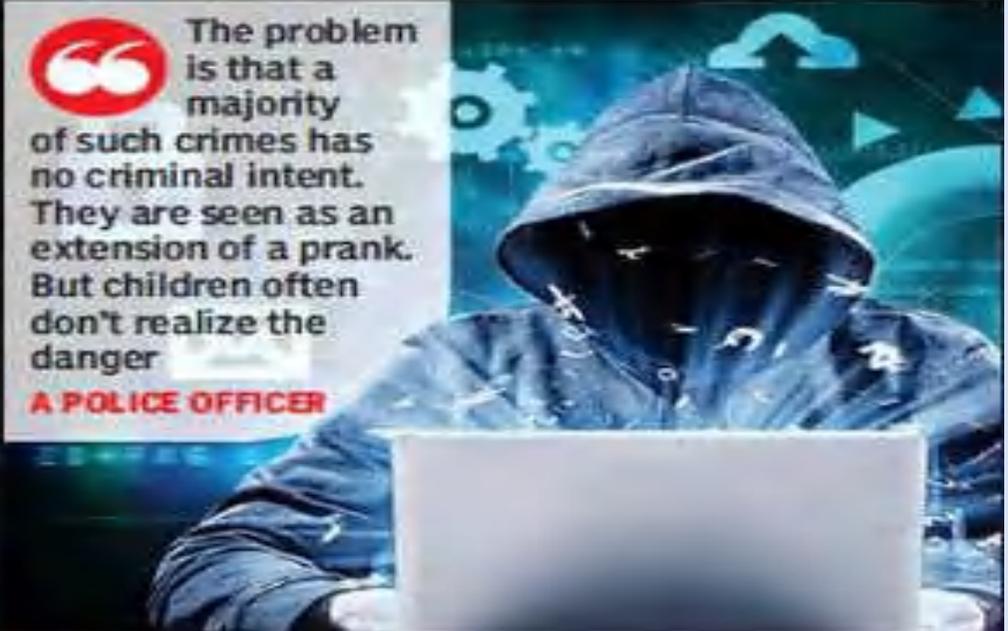

- Do not trust information or links received through bulk SMS service
- Contact the local office of your bank or telecom service company for required details

- Never share your details about UPI, Debit/Credit Cards and bank account with anyone
- In case you use internet banking, change your password regularly
- Do not share any OTP received on your phone with anyone
- Do not trust customer care numbers displayed by internet searches
- Always keep your social media profiles locked

## TAKE MEASURES BEFORE IT'S TOO LATE

India ranks **3rd** in cases of cyberbullying

City schools sit up as students post obscene memes on teachers online

The TOI story on Dec 19

### CATEGORIES OF CYBER CRIME BY KIDS

Cyberbullying | Digital piracy | Sexting

### HOW TO KEEP KIDS SAFE ON CYBER SPACE

- Use parental control software

- Place the computer in a busy area of the house
- Bookmark for safety and avoid downloads from unrecognized sources
- Set limits on late-night use; establish rules and take control
- Stay in the loop

The problem is that a majority of such crimes has no criminal intent. They are seen as an extension of a prank. But children often don't realize the danger

## Cyber Law

| Section Under IT Act 2000 | Offence                                                       | Penalty                                                                                                                                                                                                                                                                                                 |
|---------------------------|---------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Section 43                | Damage to computer, computer system, etc.                     | Compensation not exceeding one crore rupees to the person so affected                                                                                                                                                                                                                                   |
| Section 43A               | Body corporate failure to protect data                        | Compensation not exceeding five crore rupees to the person so affected                                                                                                                                                                                                                                  |
| Section 65                | Tampering with computer source documents                      | Imprisonment up to three years, or with fine which may extend up to two lakh rupees, or with both                                                                                                                                                                                                       |
| Section 66                | Hacking with computer systems, Data alteration etc.           | Imprisonment for a term which may extend to three years or with fine which may extend to five lakh rupees or with both                                                                                                                                                                                  |
| Section 66A               | Sending offensive messages through communication service etc. | Imprisonment for a term which may extend to three years and with fine                                                                                                                                                                                                                                   |
| Section 66B               | Retains any stolen computer resource or communication device  | Imprisonment for a term which may extend to three years or with fine which may extend to rupees one lakh or with both                                                                                                                                                                                   |
| Section 66C               | Fraudulent use of electronic signature                        | Imprisonment for a term which may extend to three years and shall also be liable to fine which may extend to rupees one lakh                                                                                                                                                                            |
| Section 66D               | Cheats by personating by using computer resource              | Imprisonment for a term which may extend to three years and shall also be liable to fine which may extend to one lakh rupees                                                                                                                                                                            |
| Section 66E               | Publishing obscene images                                     | Imprisonment which may extend to three years or with fine not exceeding two lakh rupees, or with both                                                                                                                                                                                                   |
| Section 66F               | Cyber terrorism                                               | Imprisonment which may extend to imprisonment for life                                                                                                                                                                                                                                                  |
| Section 67                | Publishes or transmits unwanted material                      | Imprisonment for a term which may extend to three years and with fine which may extend to five lakh rupees & in the event of a second or subsequent conviction with imprisonment of either description for a term which may extend to five years and also with fine which may extend to ten lakh rupees |
| Section 67A               | Publishes or transmits sexually explicit material             | Imprisonment for a term which may extend to five years and with fine which may extend to ten lakh rupees and in the event of second or subsequent conviction with imprisonment of either description for a                                                                                              |

**Fight the Fraudsters!**  
Report a Cyber Crime

# IPC Section 354 – D (Stalking)

## Any man who—

- Follows a woman and contacts, or attempts to contact such woman to foster personal interaction repeatedly despite a clear indication of disinterest by such woman; or
- Monitors the use by a woman of the internet, email or any other form of electronic communication, commits the offence of stalking.

## Criminal Law (Amendment Act, 2013)

| Offense  | Punishment                                                                                                |
|----------|-----------------------------------------------------------------------------------------------------------|
| Stalking | 1) Upto 3 years + Fine for first conviction<br>2) Upto 5 years + Fine for second or subsequent conviction |

| Cognizable    | Bail        | Trial By          |
|---------------|-------------|-------------------|
| 1) Cognizable | 1) Bailable | 1) Any Magistrate |
| 2) Cognizable | 2) Bailable | 2) Any Magistrate |

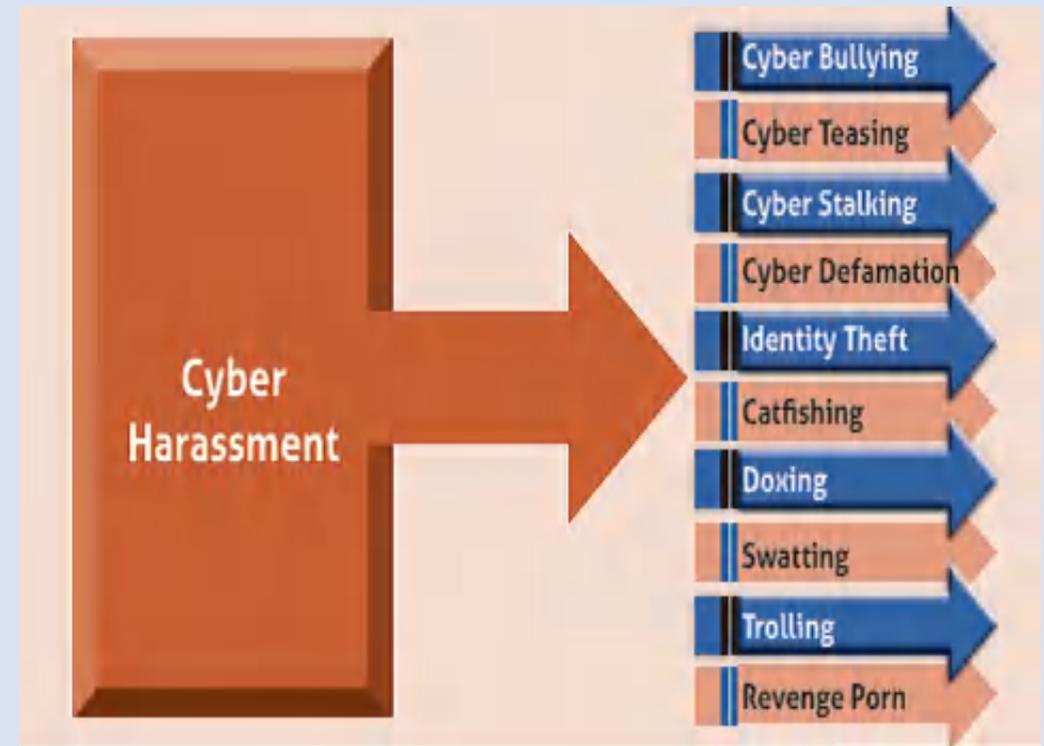

# Cyber harassment

Cyber harassment is perhaps the broadest form of cyber violence and involves a persistent and repeated course of conduct targeted at a specific person that is designed to and that causes severe emotional distress and often the fear of physical harm.

Cyber harassment is often targeted at women and girls and termed “cyber violence against women and girls” (CVAWG or Cyber VAWG) involving:

- Unwanted sexually explicit emails or other messages;
- Offensive advances in social media and other platforms;
- Threat of physical or sexual violence;
- Hate speech meaning language that denigrates, insults, threatens or targets an individual based on her identity (gender) and/or other traits (such as sexual orientation or disability).

be aware!  
**CYBERCRIME**

Don't fall for it

# Cyber Prevention for everyone

**Cyber Security** is the body of technologies, processes and practices designed to protect networks, computers, programs and data from attack, damage or unauthorized access. In a computing context, security includes both *cyber security* and *physical security*.

- 1) **Physical Security** → Protection of computer network / Internet of Things (IOT) from unauthorized access.
- 2) **Access Control** → Using Firewalls allow only authorized communications between the internal and external network.
- 3) **Password** → Password should be changed with regular interval of time and it should be alpha numeric and should be difficult to judge. Prevent the identification theft.
- 4) **Privacy Policy** → Before submitting your name, e-mail, address, on a website look for the sites privacy policy.
- 5) **Finding weakness of network** → Organization should work hard to discover security holes, bugs and weaknesses and report their findings as they are confirmed.

**Disable Remote Connectivity** when they are not in use.

Learn more about Internet privacy.

**Stay anonymous** - choose a genderless screen name.

Avoid spyware and Back up the imp Files

**Use antivirus Software**

Maintain backup

**Privacy Policy**

Uninstall unnecessary software

Check security settings

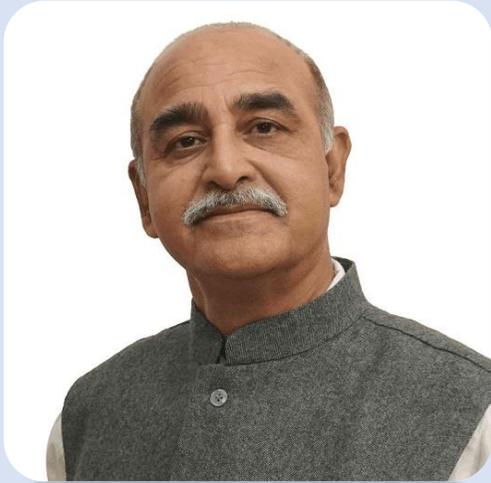

**DELETE** Security International Target  
**Virus Service** **Criminal Hacking**  
**ATTACK** **Police** Bomb CONTENT  
 Cheating User Data **MOBILE CCTV**  
**Information** **Unauthorized**  
 MALWARE Copyright  
 Criminal  
 Password **Fraud** Kidnapping  
**VIOLATION** Theft RAPE  
 Internet Justice **INVESTIGATIONS** Crime Target  
 Sexual Abuse Pornography

## Conclusion

Cases of cybercrime are increases day by day. It is important to understand types of cybercrime, Do's & Don'ts applicable law & preventing measures for personal organization safety, security & Privacy.
