DEPARTMENT OF OPHTHALMOLOGY

SUMMARY ON 2ND MEDICAL CAMP BY AIIMS RAJKOT AT SHAPAR – VERAVAL
INDUSTRIAL AREA

AIIMS Rajkot organized a second medical camp in **Shapar – Veraval Industrial Area** on **23/04/2023**. The camp was focused on providing healthcare services in all the fields of medicine. Under the guidance of respected **Professor Col. Dr. CDS Katoch**, Executive Director, AIIMS Rajkot, the medical camp aimed to provide comprehensive medical assistance to the local community.

Objective Of Camp:

The primary objective of the medical camp was to offer essential medical care and services to the residents of Parapipaliya and nearby areas. The camp aimed to identify and address health issues, provide treatment and consultations, promote health awareness, and create a positive impact on the community's well-being.

The primary objective of the **Ophthalmology department** during the medical camp was to offer expert eye care services, detect and treat eye conditions, and provide appropriate recommendations for further management.

Activities:

1. **Eye Examinations:** The Ophthalmology team conducted thorough eye examinations for patients visiting the medical camp. These examinations included assessing visual acuity, examining the external structures of the eye, and checking for refractive errors, cataracts and other common eye conditions.
2. **Diagnosis and Treatment:** Based on the examination findings, the ophthalmologists diagnosed various eye disorders and provided appropriate treatment recommendations. This included medications for eye infections or inflammations, and advising patients on lifestyle modifications or further investigations if needed.

Referral Services:

For patients requiring advanced medical care or specialized treatment, the camp facilitated referrals to AIIMS Rajkot. The team ensured seamless coordination for patients requiring follow-up visits or further interventions.

The **Ophthalmology department's** efforts during the medical camp had a significant impact on the community, promoting better eye health and early diagnosis of eye disorders.

Some moments captured during Camp (23/04/2023)

Throughout the camp, our team had the privilege of providing comprehensive eye care services to the community.

We are also immensely grateful for the collaborative spirit and support of our fellow healthcare professionals and volunteers who contributed their time, skills, and expertise to make the camp a success. The collective effort demonstrated the power of teamwork and reinforced our commitment to serving those in need.
